PROFILE

Early-career software engineer based in Auckland with a Master's in Software Engineering and hands-on experience across full-stack web development, frontend delivery, analytics automation, cloud deployment, and technical instruction. Builds practical software across responsive web interfaces, CMS/admin workflows, API-backed applications, data dashboards, ETL pipelines, and production websites. Strong fit for graduate, junior, and early-career software roles using React, JavaScript/TypeScript, PHP/Laravel, Python, SQL, APIs, AWS/GCP, and clear communication.

CURRENT FOCUS

Junior Software Engineer

Graduate Software Engineer

Frontend / React Developer

Full Stack Developer

Web / Application Developer

Data Analyst / BI Analyst

SQL dashboards

Analytics engineering

Product data

EXPERIENCE

Enrich Academy

Oct 2024 - Present

Technical Instructor, Computer Science and Programming

Auckland, New Zealand

- Teach computer science, Python programming, algorithms, and data representation at IGCSE and AS level.
- Guide students through debugging and logical problem-solving so they can resolve code issues more independently.
- Design and develop structured technical materials, coding exercises, assessments, and project-based learning tasks.
- Support digital infrastructure by configuring network connections and troubleshooting Wi-Fi and classroom systems.
- Built and maintain the Enrich Academy website and admin workflow using PHP, MySQL, JavaScript, HTML/CSS, responsive UI patterns, SEO metadata, SSL configuration, and Cloudflare deployment.
- Teach additional subjects including mathematics, physics, and English while reinforcing analytical thinking and problem-solving.
- Technologies:** Python, PHP, MySQL, JavaScript, HTML/CSS, algorithms, debugging, network setup, Cloudflare

Favour

Apr 2025 - Jul 2025

Data Analyst Intern

Auckland, New Zealand

- Led end-to-end data operations as the company's first data specialist, building analytics foundations from scratch for a fast-growing FMCG startup.
- Developed and automated ETL pipelines to extract, clean, and integrate Amplitude and MySQL data using Python, Google Cloud Platform, PowerShell, JSON, and free/open-source tools.
- Built interactive Looker Studio and Power BI dashboards visualizing user behavior, product performance, and campaign ROI.
- Collaborated directly with the founder, translating business questions into measurable insights for partner negotiations and growth strategy.
- Presented analysis that contributed to securing the Whittaker's distribution contract and helped Favour reach its first profitable quarter.
- Technologies:** Python, BigQuery, Google Cloud Platform, Looker Studio, Power BI, PowerShell, MySQL, Excel, Amplitude, JSON

Scratchpad NZ

Sep 2024 - Sep 2025

Junior Technology Instructor

Auckland, New Zealand

- Taught programming, robotics, and creative technology to students aged 7-16, covering Python, Scratch, Arduino, and programming fundamentals.
- Designed tailored coding projects for advanced learners, encouraging problem-solving and logical thinking.
- Guided students through debugging, testing, and improving their own code.
- Created hands-on examples including mini-games, automation scripts, and sensor-based robotics tasks.
- Communicated student progress with parents, staff, and the wider teaching team.
- Technologies:** Python, Scratch, Arduino, Pygame, Turtle, electronics kits

Air Smart Technology SDN BHD

Apr 2019 - Sep 2020

Full Stack Engineer

Penang, Malaysia

- Maintained and enhanced the company's inventory management system across React frontend screens, backend logic, database-backed workflows, and internal user support.
- Built and updated inventory-system interface features and website UI using React, JavaScript, TypeScript, HTML, and CSS.
- Delivered full-stack technical support from network troubleshooting to software fixes and IT solutions, improving reliability across daily operations.
- Responded to client and staff requests as a technical consultant, translating operational needs into practical software changes, fixes, and documentation.
- Introduced process improvements that reduced recurring technical issues and improved support response times.
- Provided training and documentation to staff on new systems and best practices.
- **Technologies:** React, JavaScript, TypeScript, HTML/CSS, inventory systems, full-stack troubleshooting, documentation, user support

Skylogistics Tours & Travel SDN BHD

Jan 2018 - Feb 2019

Software Developer

Penang, Malaysia

- Developed and enhanced booking and customer management software in TravelPoint and Galileo systems.
- Built and maintained JavaScript, HTML/CSS, and web workflow improvements for booking and customer-facing processes.
- Performed software maintenance, debugging, and performance optimization to improve reliability.
- Collaborated with cross-functional teams to gather requirements and implement features.
- Developed and maintained technical documentation for software applications and systems.
- **Technologies:** JavaScript, HTML/CSS, booking systems, TravelPoint, Galileo, debugging, documentation

SELECTED PROJECTS

Enrich Academy Website Production

Production responsive website and admin workflow for an Auckland academy. Built dynamic program pages, class listings, branch details, enquiry handling, SEO metadata, WhatsApp contact flow, SSL configuration, and Cloudflare deployment.

Impact: Production-ready CMS-style website with Lighthouse 95+ mobile performance.

Technologies: PHP, MySQL, JavaScript, HTML/CSS, SEO, JSON-LD, OpenGraph, Cloudflare | <https://enrichacademynz.co.nz>

Skylogistics Multi-Language Travel Website Frontend

Mobile-first multilingual website for a travel agency, localized in English, Bengali, and Malay through JSON-based i18n. Built reusable components for navigation, footer, language switching, and WhatsApp CTA.

Impact: Fast production website with Lighthouse 95+ mobile performance.

Technologies: Astro, TailwindCSS, JavaScript/TypeScript, JSON i18n, Cloudflare Pages, GitHub, JSON-LD

Medwell Pharmacy Patient Portal Full Stack

Full-stack pharmacy management platform supporting patient registration, inventory control, medicine interaction checks, prescription label automation, and stock alerts.

Impact: Demonstrated end-to-end delivery across frontend, backend, database, authentication, APIs, and cloud deployment.

Technologies: Laravel, Vue.js, MySQL, AWS EC2, AWS S3, REST APIs, JWT authentication

Mental Wellness Tracker App Team Project

Culturally inclusive wellness app aligned with Te Tiriti o Waitangi principles, built in a 3-person agile team. Implemented authentication, data protection considerations, modular components, and integration testing.

Impact: Delivered a privacy-conscious software project with maintainable structure and team-based delivery.

Technologies: Python, Flask, HTML/CSS, JavaScript, SQLite, GitHub CI/CD

Bus Tracking System API

Live bus tracking web app using the Auckland Transport API to visualize real-time vehicle positions and route updates. Integrated API polling, JSON parsing, and mapping logic within a PHP backend, containerized with Docker.

Impact: Built a real API-backed application with live data handling and repeatable runtime setup.

Technologies: PHP, Docker, JavaScript, Auckland Transport API, JSON

Fitness Tracker Data Modeling and Ethics Report Data

Data analytics project using anonymized fitness tracker datasets to identify engagement patterns through regression and clustering, with a written ethics component covering privacy, consent, and data governance.

Impact: Combined applied data analysis with responsible AI and analytics documentation.

Technologies: Python, Pandas, NumPy, Scikit-learn, Excel, KNIME

EDUCATION

Master's Degree in Software Engineering Yoobee College of Creative Innovation	Jul 2024 - Jul 2025
Auckland, New Zealand	
Bachelor of Computer Science Swinburne University of Technology	Mar 2021 - Dec 2023
Sarawak, Malaysia	
Diploma of Education, Computer Engineering Penang Skills Development Centre	Feb 2018 - Sep 2020
Penang, Malaysia	
Yoobee MSE-B Student Representative Volunteering	Jul 2024 - Jul 2025
Liaison between students and faculty; coordinated events and supported student communication.	

CERTIFICATIONS

- Data Engineering Foundations Professional Certificate - Astronomer
- Docker Foundations - Docker
- Career Essentials in GitHub - Microsoft & LinkedIn
- Career Essentials in Software Development - Microsoft & LinkedIn
- Career Essentials in Data Analysis - Microsoft & LinkedIn
- LambdaTest Software Testing Professional Certificate - LambdaTest
- JavaScript Foundations - Mozilla
- Java Foundations - JetBrains
- Microsoft Azure AI Essentials - Microsoft & LinkedIn
- Anaconda Python for Data Science - Anaconda, Inc.
- Data Science - KNIME
- Vector Database - Weaviate
- DevOps - PagerDuty
- Ubuntu Linux - Canonical
- C++ Programming Professional Certificate - OpenEDG
- ServiceNow IT Leadership - ServiceNow

TECHNICAL SKILLS

- Frontend:** React, JavaScript, TypeScript, Vue.js, Astro, TailwindCSS, HTML, CSS, responsive design, component-based UI, SEO metadata, JSON-LD, OpenGraph
- Backend:** PHP, Laravel, Python, Flask, Java fundamentals, REST APIs, JWT authentication, MySQL, SQLite, file-based persistence
- Data and analytics:** SQL, BigQuery, ETL pipelines, JSON, Amplitude, Looker Studio, Power BI, Excel, Pandas, NumPy, Scikit-learn, KNIME
- Cloud, DevOps, and tooling:** Git, GitHub, GitHub CI/CD, Docker, Cloudflare Pages, AWS EC2, AWS S3, Google Cloud Platform, Linux CLI, PowerShell
- Testing and delivery:** Debugging, integration testing, API integration, documentation, client/user requirement gathering, technical training
